

# Miracle Seat®

Fresh

It's a vacuum toilet seat that COMPLETELY removes all odors BEFORE they escape from the toilet bowl.

*Foul odors & germs are vacuumed out before they escape the toilet bowl -*

Clean

It vacuums microscopic airborne particles including viruses and bacteria from the toilet bowl and vents them outside of the building.

Simple

The kit includes the seat and an electric fan that is wired to the bathroom light. A standard installation takes less than 2 hours.

*Miracle Seat has been tried and proven in homes, offices, restaurants, clinics & schools. Users quickly come to realize its unique benefits. Use Miracle Seat for fresh air in your.....*

# Miracle Seat® *It sucks!*

## Vented Seat & Fan Send Odors Outside of the Building

Vents in the bottom of the seat capture odors and germs before they escape from the toilet bowl. A 1.5 inch pipe leads from the seat to the fan that provides the vacuum. A 3 inch duct may be run from the fan to an exterior vent or gable or to an existing ceiling fan duct.

### ***During toilet use, germs can\* :***

- Spread out over six feet through the air.
- Linger in the air for up to 2 hours.
- Land on tissues, towels, toothbrushes & counter tops.
- Live up to 3 days on moist surfaces, towels and crevices.

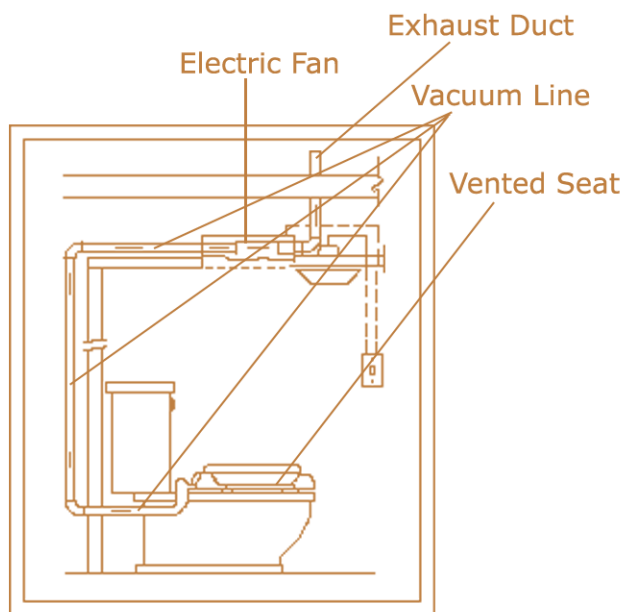

### ***Germs found in toilet emissions include\* :***

- Fecal coliform
- Hepatitis A
- Shigella
- Norwalk Virus
- Salmonella
- Other Viruses & Bacteria

\* Documentation of independent scientific studies is available on the Miracle Seat website.

## Do-it-Yourself Installation

The Miracle Seat Kit includes the vented toilet seat and a 90 cfm electric fan. A 1.5" PVC or steel pipe is needed to run from the toilet to the fan and a 3" duct that runs from the fan to a vent is also required. ***A typical installation in a one-story home or office will take a novice less than 2 hours to complete.***

***NOTE:*** the 1.5" pipe, 3" duct, connectors, elbows, glue and electrical wire are not included. Installation instructions direct the installer to a local hardware store or home improvement center for these parts.

***Miracle Seat generates store traffic!***

## Commercial Installation

No fan is required for buildings with central HVAC systems. The seat can draw suction from the existing ductwork. Simply run a 1.5" Steel or PVC pipe from the toilet to the intake duct and attach using a damper to draw sufficient suction through the seat's vents.

Compare ***total costs of ownership*** of automatic fragrance dispensers and Miracle Seats. Miracle Seats require no chemicals, batteries, filters, special cleaning or maintenance. Janitorial staff need not remember to refill dispensers and the seats have no moving parts to wear out.

Fragrance dispensers and ceiling vents DO NOT ELIMINATE the odor. The Miracle Seat keeps it from getting out of the toilet bowl in the first place!
